Let’s Learn Phonics!

Everyone Reading’s after-school tutoring program explicitly teaches children phonics and fluency through multisensory and fun activities!

Warm Up! Tongue Twisters and Nursery Rhymes!

The class begins with pronunciation and auditory memory practice featuring classic tongue twisters and nursery rhymes. The children not only are building these skills, but through acting out the rhymes they enhance their recall of information through kinesthetic processes of learning.

Explicit Instruction

Once the students are warmed up, they delve into explicit instruction that gradually builds. They begin with sounding out vowels and consonants. They practice reading and spelling words in lists and sentences, using their learned phonics skills. Putting everything together, they reinforce their fluency with games such as Bingo.

Bingo! Bingo! Bingo!

During Bingo the children combined various skillsets. They begin by creating their own Bingo boards based on a list of words. Not only do the children spell out the words, they sound out the words. Then, during the game students had to listen and recognize words. Without even knowing it, the children expand their phonics and fluency during the game!

“[Our children] just made a lot of progress and really enjoy coming here!” - parent
